OpenChain / ORT

- Point of contact: Shane Coughlan, Thomas Steenbergen, Marcel Kurzmann
- OpenChain event in Stuttgart (April 7-9)
- ORT Community Days is planned to be be held together
- Goals
  - Hear from industry peers as they share their open source processes and best practices.
  - Experience demonstrations from tool creators showcasing automated compliance solutions.
  - Participate in technical sessions focused on overcoming common challenges in the field.
  - Discover available support options from both the community and government resources

OWASP/CycloneDX

- Point of contact: Alyssa Wright and Steve Springett

- Present ClearlyDefined to community

- Enhance our documentation

- The difference between Declared and Discovered licenses is explained in our documentation:

    - Example of different Declared and Discovered licenses

    - Example of multiple attributions

Eclipse Foundation

- Point of contact: Boris Baldassari, Marcel Kurzmann

- [Open Regulatory Compliance Working Group](#)
- [Eclipse Apoapsis](#):

- The Eclipse Apoapsis project provides a process and a reference implementation for large-scale software composition analysis (SCA). The **ORT Server** reference implementation is based on the **OSS Review Toolkit** (ORT).

Thank you
