

ClearlyDefined

Community Meeting - June 2, 2025

Agenda

- Maintainer Month: Licensing, SBOMs, and Security
- Maintainer Month: 50 maintainers share their stories
- Maintainer Month: CRA with Eclipse Foundation
- cdsbom: GUAC and Linux Foundation

Maintainer Month

- Jeff Luszcz [presented](#) at GitHub's Maintainer Month

What Maintainers need to know about Open Source Licensing, SBOMs and Security

MAY 6, 10 AM PST

Jeffrey Luszcz GitHub

Maintainer Month

- Nick drafted [blog post](#) to be published at OSI's website and newsletter (15K)

Maintainer Month

- Nick in touch with 50 maintainers, who shared their [stories](#).

Stories from maintainers

Akihiro Suda @AkihiroSuda

I'm Akihiro Suda, a software engineer at NTT in Japan. I've been a contributor and a maintainer of several projects related to container virtualization on Linux for almost a decade: Docker, BuildKit, containerd, runc, nerdctl, and Lima. [Read story](#)

Alejandra Gonzalez @blyxyas

I'm Alejandra, one of the people that maintains Clippy, Rust's official linter. At the end of the day we're humans managing human work. With people that deserve their reviews, reviews that deserve their quality assurance (in a timely manner) and users that deserve that their issues be resolved. [Read story](#)

Alex Gaynor @alex

My name is Alex, and I've been involved in open source software for more than 15 years. My first contribution was to Django, the Python web framework. [Read story](#)

Alexander Brandes @NotMyFault

These days, I'm primarily involved in the Jenkins project. I contribute to Jenkins Core, maintain several plugins, and help with weekly and Long Term Support (LTS) releases. I also serve on the Jenkins governance board, where I work on community processes, release coordination, and broader project direction. [Read story](#)

Maintainer Month

- Eclipse Foundation held CRA [webinar](#) with maintainers.

May 27

16:00 pm - 17:00 pm UTC

cdsbom

- Jeff Mendoza released [cdsbom](#) and companion tools
- Gary from LF exploring CD for all projects from the Linux Foundation

The screenshot shows the GitHub repository for **cdsbom**, which is public. At the top, there are buttons for Watch (2), Fork (1), and Star (7). Below this, the repository is listed as **main** with 1 branch and 0 tags. A search bar and buttons for "Add file" and "Code" are present. The main content area displays a table of files and their commit history:

File	Commit Message	Time
pkg	Add sbomcoords tool	2 months ago
sbomcoords	Add sbomcoords tool	2 months ago
sbomnotice	Add ratelimiting.	4 months ago
LICENSE	Initial commit.	5 months ago
README.md	Add sbomcoords tool	2 months ago
go.mod	Add sbomcoords tool	2 months ago
go.sum	Add sbomcoords tool	2 months ago
main.go	Add ratelimiting.	4 months ago

Below the file list, there are tabs for **README** and **MIT license**. The **README** tab is active, showing the title **ClearlyDefined SBOM tools** and the text: "This repository contains tools for using SBOMs with [ClearlyDefined](#)".

On the right side of the repository page, there is an **About** section with the description: "Tool for using SBOMs with ClearlyDefined". It also lists links for Readme, MIT license, Activity, 7 stars, 2 watching, and 1 fork. Below this is a **Releases** section stating "No releases published" and a **Packages** section stating "No packages published". At the bottom, there is a **Contributors** section with 2 contributors: **jeffmendoza** (Jeff Mendoza) and **goneall** (Gary O'Neill).
